Profile

- I'm a Full Stack Engineer with 2+ years of experience interacting with clients & product owners and also a UI/UX designer by interest.
- Being adventurous & an addictive learner by nature and possessing a core interest in technology & psychology, I found my passion in building products.
- I love trying new technologies and enjoy working on frontend backend stacks, system design & even the multiple layers under them!

Professional Experience

Full Stack Engineer | Founding Team, CareerNinja

Dec 2019 – present
Mumbai, India

- Among first 3 employees of the team. Experienced a **product journey from 0 to 1**.
- Responsible for building and managing the frontend of complete app suite at CareerNinja from scratch catering ~80k+ users with a team of 4 developers.
- Built micro-frontend architecture for performance optimization and increased product usability with UI/UX.
- Worked on end to end implementation (Design, Development and Architect) of various systems with few based on NLP models for better personalization and content recommendations.
- Worked closely on tech team building and hiring.
